

PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience building full-stack web applications using React, Node.js, AWS Serverless and modern frontend tooling.

Proven in fintech and insurance domains with strong skills in API design, automation, performance testing and CI/CD-driven delivery.

Passionate about improving release quality with Playwright E2E automation, scalable backend services, and cloud-native architectures.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

LTIMindtree Limited (LTM), Hyderabad, India

October 2024 – Present

- Senior fullstack developer outsourced in development for an insurance admin tool using Node.js, React, MongoDB and AWS Serverless backed by Genesys Cloud CX to manage customer experience configurations
- Track lead for a core module: owned API design, architecture, sprint sequencing and mentoring for timely delivery
- Designed and delivered a CI-integrated Playwright E2E framework that runs pre-build and post-deploy smoke tests, increasing release confidence and reducing regressions
- Built data-driven Playwright test suites using tags to run the same scenarios across multiple configurations, improving coverage and maintainability
- Established automated pre-deploy and post-deploy validation checks to catch issues earlier in the pipeline and shorten mean time to detection
- Developed Artillery-based load testing plans to identify and remediate performance bottlenecks under realistic traffic patterns

Senior Software Engineer

Edgeverve Systems Limited, Hyderabad, India

August 2023 – October 2024

- Contributed to a web-transformation of a treasury solution, focusing on frontend and performance improvements
- Designed and executed Artillery load tests to validate stability and guide capacity planning
- Architected a webpack-based client customization framework to enable rapid, client-specific UI variants
- Automated critical user flows with Playwright to reduce manual QA effort and shorten release cycles
- Implemented signature-based pre-validation to mitigate malicious requests and strengthen input validation
- Authored onboarding and technical documentation to accelerate new-hire ramp-up

SKILLS

- JavaScript
- TypeScript
- React
- Node.js
- Redux Toolkit
- Jest
- SCSS
- Playwright
- AWS
- AWS Amplify
- Serverless
- Python
- FastAPI
- Pydantic

SOFT SKILLS

- Communication
- Teamwork
- Problem Solving
- Adaptable to new technologies
- Mentoring and knowledge sharing

IN PROGRESS

- Advance Python
- AI Engineering
- AI Agents and RAG Application development
- AWS Bedrock
- Rapid App Delivery with AWS Amplify Gen

Senior Software Engineer

Mphasis Limited, Bangalore, India

April 2021 – August 2023

- Built scalable, modular web applications for a fintech client using React and Node.js
- Modernized legacy screens with responsive UI and improved UX using React and Bootstrap
- Developed onboarding flows, dashboards and interactive visualizations using Redux Toolkit and D3.js to improve user analytics
- Owned API contract design and collaborated with backend teams to ensure scalability and performance

Mid Software Engineer

National Atmospheric Research Laboratory (NARL), Tirupati, India

December 2014 – March 2021

- Developed a web application for atmospheric research data management using Python and Django
- Led in-house development of Radar Controller software to operate and monitor weather radar systems, improving reliability
- Built CLI and web tools for housekeeping and health monitoring of radar systems
- Automated radar data processing pipelines with NumPy and Pandas to eliminate manual processing and speed up product generation

Junior Software Engineer

Semi Conductor Laboratory (SCL), Mohali, India

October 2013 – November 2014

- Developed a web application for semiconductor manufacturing data management
- Built CSV-driven visualization tools to track batch- and wafer-level failures for production analytics
- Contributed to Mask Data Preparation and Analysis tooling to improve manufacturing throughput

EDUCATION

B.Tech, Avionics

Indian Institute of Space Science and Technology
(IIST)

Electronics, Computers, DBMS • 2013

Intermediate, MPC

Sri Chaitanya Raman Bhavan Campus, Vijayawada

Maths, Physics, Chemistry • 2009
